

Spit EU ETS / non ETS

[Key to colour coding](#)

[Notation keys](#)

The ETS scope to be taken into account is the 2013-2020 ETS scope for all projected years (2010 - 2030). ETS projections should include emissions from aviation as defined in the ETS directive (i.e. including outgoing and incoming flights)

For the EU ETS emissions, report domestic aviation and international aviation emissions separately.

Enter data in white cells, yellow cells contain equations that are updated automatically. Further information on the emissions sources to be included in the EU ETS and the non ETS sectors can be found in the sheet 'guidance'.

With existing measures						
Non ETS emissions (emissions in the sectors not covered by the EU ETS)	Total GHG (Gg CO ₂ equivalent)					
	2010	2010	2015	2020	2025	2030
Total (excluding LULUCF and all aviation emissions)	0,0	0,0	13 783,8	11 900,9	10 834,5	9 768,0
Energy - Energy Industries (1A1)						
Manufacturing Industries and Construction (1A2)						
Transport (1A3) - excluding domestic aviation						
Other combustion sectors (1A4 + 1 A5)						
Energy - Fugitive emissions form fuels (1B)						
Industrial Processes (2)						
Solvents and other product use (3 + 7)			0,0	0,0	0,0	0,0
Agriculture (4)			7 498,4	7 420,9	6 832,0	6 243,0
Waste (6)			6 285,4	4 480,0	4 002,5	3 525,0
EU ETS emissions (emissions in the sectors covered by the EU ETS)	Total GHG (Gg CO ₂ equivalent)					
	2010	2010	2015	2020	2025	2030
Total excluding LULUCF and including international bunkers	0,0	0,0	0,0	0,0	0,0	0,0
Energy - Energy Industries (1A1)						
Manufacturing Industries and Construction (1A2)						
Other combustion sectors (1A4 + 1 A5)						
Energy - Fugitive emissions form fuels (1B)						
Industrial Processes (2)						
Aviation (all in- and outgoing flights, i.e. domestic and international)	0,0	0,0	0,0	0,0	0,0	0,0
Domestic aviation (1A3a)						
International Bunkers						

With additional measures						
Non ETS emissions (emissions in the sectors not covered by the EU ETS)	Total GHG (Gg CO ₂ equivalent)					
	2010	2010	2015	2020	2025	2030
Total (excluding LULUCF and all aviation emissions)	15 666,8	15 666,8	13 783,8	11 900,9	10 834,5	9 768,0
Energy - Energy Industries (1A1)						
Manufacturing Industries and Construction (1A2)						
Transport (1A3) - excluding domestic aviation						
Other combustion sectors (1A4 + 1 A5)						
Energy - Fugitive emissions form fuels (1B)						
Industrial Processes (2)						
Solvents and other product use (3 + 7)	0,0	0,0	0,0	0,0	0,0	0,0
Agriculture (4)	7 575,9	7 575,9	7 498,4	7 420,9	6 832,0	6 243,0
Waste (6)	8 090,8	8 090,8	6 285,4	4 480,0	4 002,5	3 525,0
EU ETS emissions (emissions in the sectors covered by the EU ETS)	Total GHG (Gg CO ₂ equivalent)					
	2010	2010	2015	2020	2025	2030
Total excluding LULUCF and including international bunkers	0,0	0,0	0,0	0,0	0,0	0,0
Energy - Energy Industries (1A1)						
Manufacturing Industries and Construction (1A2)						
Other combustion sectors (1A4 + 1 A5)						
Energy - Fugitive emissions form fuels (1B)						
Industrial Processes (2)						
Aviation (all in- and outgoing flights, i.e. domestic and international)	0,0	0,0	0,0	0,0	0,0	0,0
Domestic aviation (1A3a)						
International Bunkers						

Without measures						
Non ETS emissions (emissions in the sectors not covered by the EU ETS)	Total GHG (Gg CO ₂ equivalent)					
	2010	2010	2015	2020	2025	2030
Total (excluding LULUCF and all aviation emissions)	0,0	0,0	0,0	0,0	0,0	0,0
Energy - Energy Industries (1A1)						
Manufacturing Industries and Construction (1A2)						
Transport (1A3) - excluding domestic aviation						
Other combustion sectors (1A4 + 1 A5)						
Energy - Fugitive emissions form fuels (1B)						
Industrial Processes (2)						
Solvents and other product use (3 + 7)	0,0	0,0	0,0	0,0	0,0	0,0
